

REGIONAL SEO ARCHITECTURE REPORT

Executive Summary: This report documents the implementation of the country-wise SEO architecture for Aditya Chemicals. To capture target search queries for specific chemical compounds in the ****USA, UK, and Europe****, a regional URL subpath structure was established. This allows search engine crawlers to rank specific country versions independently, backed by localized compliance standards and logistics integrations.

1. REGIONAL ROUTING & URL DIRECTORY STRUCTURE

The Next.js App Router directories have been restructured into dedicated route segments. This setup serves localized copies of the landing page and specific high-priority product specifications under distinct country paths, while maintaining a global fallback path.

MARKET REGION	SUBPATH SEGMENT	TARGET LOCATION / FOCUS	BUILD RESOLVES TO
Global / India	/ (Default)	Global fallback, Indian domestic compliance & export capabilities	app/(global)/products/[slug]/page.tsx
United States	/us	FDA regulations, Florida local warehousing, USP/FCC standards	app/us/products/[slug]/page.tsx
United Kingdom	/uk	UK-REACH, direct freight pipelines, British Pharmacopoeia (BP)	app/uk/products/[slug]/page.tsx
European Union	/eu	EU-REACH, European distribution, European Pharmacopoeia (EP)	app/eu/products/[slug]/page.tsx

This allows target product listings to resolve correctly (e.g. /us/products/glycine and /uk/products/glycine) and dynamically fetch localized parameters.

2. COUNTRY-WISE METADATA SPECIFICATIONS

Page metadata (Meta Titles, Descriptions, and Keywords) are dynamically configured per region to capture target search queries (e.g., "glycine manufacturer in USA" or "REACH registered chemical factory Europe").

A. Landing Page Metadata

REGION PATH	META TITLE	META DESCRIPTION
/ (Global)	Aditya Chemicals Global API & Chelated Minerals Manufacturer	GMP-certified API & bulk Chelated Minerals manufacturer. Supplying high-purity chemicals, excipients, and amino acids to the USA, UK, Europe, and globally.
/us (USA)	Aditya Chemicals USA FDA Registered & Bulk Excipients Supplier	Aditya Chemicals US division supplies high-purity APIs, chelated minerals, and excipients in bulk. Local warehousing in Boca Raton, Florida for fast transit.
/uk (UK)	Aditya Chemicals UK BP Standard & UK-REACH Compliant Chemicals	Aditya Chemicals UK division supplies high-purity APIs, chelated minerals, and excipients in bulk. Fully compliant with BP standards and UK-REACH.
/eu (Europe)	Aditya Chemicals Europe EP Standard & EU-REACH Compliant	Aditya Chemicals EU division supplies high-purity APIs, chelated minerals, and excipients in bulk. Fully compliant with EP standards and EU REACH registrations.

B. Product Page Metadata (Example: Glycine)

REGION PATH	META TITLE	META DESCRIPTION / KEYWORDS FOCUS
/products/glycine	Glycine (CAS 56-40-6) Manufacturer & Bulk Supplier USA, UK, Europe Aditya Chemicals	Buy high-purity Glycine in bulk. Compliant with IP/BP/EP/USP/FCC/INJ/IH/Tech GMP-certified manufacturing, reliable global shipping.
/us/products/glycine	Glycine (CAS 56-40-6) Manufacturer & Bulk Supplier USA	Buy bulk Glycine in the USA. FDA-registered GMP supply, localized shipping from our Florida warehouse. Focuses: FDA, USP/FCC, US factory.

REGION PATH	META TITLE	META DESCRIPTION / KEYWORDS FOCUS
/uk/products/glycine	Glycine (CAS 56-40-6) Manufacturer & Bulk Supplier UK	Buy bulk Glycine in the UK. Compliant with BP pharmacopeia standards and UK-REACH regulations. Focuses: BP, UK-REACH, UK distributor.
/eu/products/glycine	Glycine (CAS 56-40-6) Manufacturer & Bulk Supplier Europe	Buy bulk Glycine in Europe. Compliant with EP standards and active EU REACH registration. Focuses: EP, EU-REACH, Euro logistics.

3. REGIONAL CONTENT MODEL & SCHEMA (JSON-LD)

The product database (`data/products.ts`) is extended with a localized content matrix for the top 8 products, supplying custom introductions, regulatory compliance records, and shipping notes based on the active viewport.

A. Shared Component Rendering Logic

A reusable page component (`components/ProductDetailView.tsx`) was created. It dynamically parses the region prop and swaps out content values cleanly:

```
const regional = product.regionalContent?.[region];
const introText = regional?.intro || product.description;
const complianceText = regional?.complianceNote || "Manufactured under BP/EP/USP standards...";
const shippingNoteText = regional?.shippingNote || "";
```

B. Schema.org (JSON-LD) Structuring

To fix search engine indexing errors and support region-specific search results:

- **Removed Invalid pricing:** The placeholder string "Contact for Pricing" was completely removed from the `AggregateOffer` product block to meet GSC numeric validation rules.
- **Region-Specific localBusiness:** Rather than inject all physical sites, each regional product page injects only its target business entity (the Florida warehouse for US views, and the India headquarters for default, UK, and European views).
- **Target Area Injection:** Injecting a `areaServed` ("US", "GB", "EU", "IN") inside the product metadata blocks.

4. SITEMAP & HREFLANG CANONICAL SETUP

To ensure search engines crawl and attribute these pages correctly without duplicate indexation penalties:

A. Link alternates & canonical Setup

Every regional product page uses a self-referencing canonical tag pointing to its absolute URL, and peer links mapping to other language versions including `x-default`:

```
<link rel="canonical" href="https://www.adityachemicals.com/us/products/glycine" />
<link rel="alternate" hrefLang="en-US"
href="https://www.adityachemicals.com/us/products/glycine" />
<link rel="alternate" hrefLang="en-GB"
href="https://www.adityachemicals.com/uk/products/glycine" />
<link rel="alternate" hrefLang="en-DE"
href="https://www.adityachemicals.com/eu/products/glycine" />
<link rel="alternate" hrefLang="x-default"
href="https://www.adityachemicals.com/products/glycine" />
```

B. Dynamic Sitemap Generator

The sitemap (app/sitemap.ts) dynamically maps the 3 hub pages and the regional product URLs **only for the top 8 products** that have localized copy. All other products remain restricted to the default path to prevent indexing empty regional pages.
